More about FlightDeck. FlightDeck A32x was developed over a period of some years by a group of active Airbus pilots in order to provide a useful training tool for other Airbus fellow pilots.. The goal was to have an individual procedure trainer (IPT) right on the personal laptop or PC. Learning to handle the Airbus A320 and the complex systems should be fun - we believe in "game learning" and ...

In 2016 (as a response to the Airbus A320 NEO), Boeing introduced the 'MAX' series – designated MAX-7, MAX-8, MAX-9, MAX-10, MAX-200. The MAX-8 was the first to enter service – in 2017. The MAX variants offer four lengths, with options for 138 to 230 seats and a range of between 3,215 and 3,825 nautical miles.

### Pilot Operating Manual - X-Plane 11

Takeoff. Once an aircraft has lined up, the pilots first increase the engine power to 40-60% N 1 (low-pressure compressor RPM) on Boeing aircraft, and 50% N 1 on Airbus aircraft. This is done to prevent flameout on takeoff due to compressor stall.Once the engines are confirmed to be stable, the pilots then either press the TO/GA switch, causing the thrust levers to automatically advance ...

### Takeoff/go-around switch - Wikipedia

A side-stick or sidestick controller is an aircraft control column (or joystick) that is located on the side console of the pilot, usually on the righthand side, or outboard on a two-seat flightdeck.Typically this is found in aircraft that are equipped with fly-by-wire control systems.. The throttle controls are typically located to the left of a single pilot or centrally on a two-seat flightdeck.

### Side-stick - Wikipedia

The 737 is lower to the ground than the A320, and the new engines have a larger diameter. So while both manufacturers would have to do work, the Boeing guys would have more work to do to jack the ...
