The Reality Of The End Of Oil | OilPrice.com

Is the concept of "peak oil" dead? Maybe, but not for long. What is happening now already occurred 25 years ago. We are living through a zombie oil market, a return of the oil era circa 1995, the last time demand was only 70 million barrels per day (bpd). Until this pandemic-induced crash, we were witnessing an energy transition from conventional oil to non-conventional fossil fuels such ...
